

# YM Series Hydraulic Door Frame Embossing Machine

▶ Low Maintenance and easy operation

▶ Fast working speed and high efficiency

▶ Frame structure with high rigidity

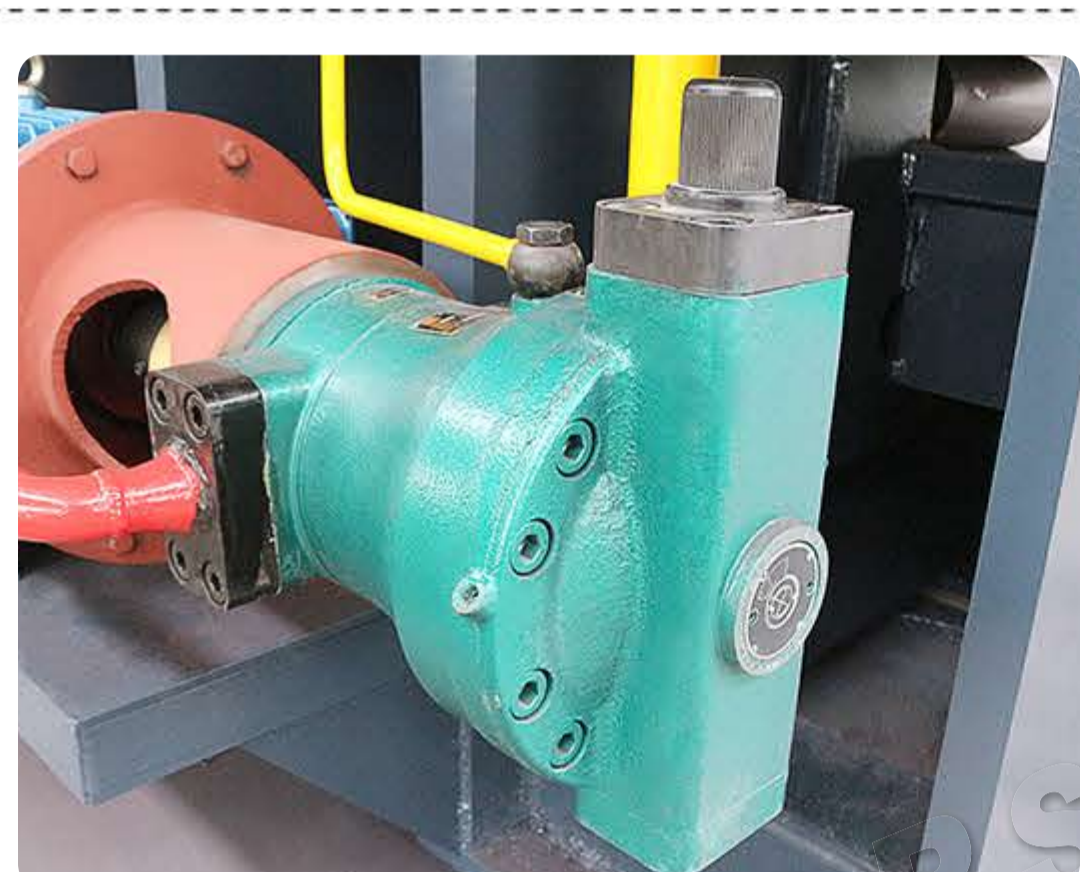

## Cylinder

- Polished and high rigidity treatment.

## Main Motor

- Siemens brand from Germany.

## Hydraulic axial plunger pump

- High rated pressure, compact structure, high efficiency and easy flow adjustment.

## Return Cylinder

- Hold the ram to move up.

## Hydraulic Valve

- Cartridge valve equipped for hydraulic control system, reliable, durable and less hydraulic shock, shorter connection pipeline and fewer release points. Hydraulic integrated system is adopted separate control unit.

## Electric Parts

- Schneider brand from France.

## Pressure Gauge

- Check the hydraulic working pressure.

## mold frame and skin mold

- Different designs for selection.

## EMBOSSED DOOR FRAME SHEET
